

THE TOORAK COSMETIC SURGERY CENTRE

BRINGING TIRED-LOOKING EYES TO LIFE

Beautiful, appealing eyes bring sparkle and life to a face.

Dull, plain or aged, tired-looking eyes can now be given beautiful shape and life through the advanced techniques of modern plastic surgery. Attractive curves and a natural depth of shadow can replace heaviness and drooping above the eyes.

The correct surgical technique (operating beneath the skin) provides a permanent result without a perceptible scar. Beautifully shaped eyelids, whether natural or the result of surgery, make the entire face look younger and delay the overall appearance of facial ageing into the future.

Dull, drooping eyelids convey a look of tiredness and age.

Beautifully contoured eyelids create appealing, lively eyes.
